1. The following is a SUPPLEMENTAL Examiner's Statement of Reasons for Allowance:

The prior art of record fails to teach or fairly suggest a system for transmitting originated information from an originating processor in an electronic mail system to a destination processor in the electronic mail system comprising an RF information transmission network and an interface switch, which connects the electronic mail system to the RF information transmission network, and transmits the originated information received from the electronic mail system to the RF information transmission network, and wherein the originated information is transmitted to the interface switch in response to an address of the interface switch added to the originated information at the originating processor or the electronic mail system and the originated information is transmitted from the interface switch to the RF information transmission network with an address of the destination processor added at the originating processor, or by either the electronic mail system or the interface switch. And further, the electronic mail system transmits other originated information from an originating processor to a destination processor in the electronic mail system through a wireline without transmission using the RF information transmission network.
